

Alvi Aziz

Queens, NY | imelvee55@gmail.com | (646) 316-7465 | imelvee.github.io | linkedin.com/in/alvi-aziz | github.com/imELVEE

Education

Hunter College, CUNY — B.A. Computer Science, GPA: 3.33 January 2025
St John's University — The National Society of Leadership and Success, Dean's List Fall 2020 - Fall 2021
Stuyvesant High School, SAT: M: 800 EBRW: 770 June 2020

Experience

Database Design Intern, Brooklyn Chamber of Commerce – Brooklyn, NY Jul 2024 – Aug 2024

- Designed and implemented a normalized Microsoft Dataverse database to organize customer information and support accurate record management.
- Defined entity relationships and data models to support scalable, consistent handling of customer records.

Home Attendant, Public Partnerships Home Care, LLC / C&T Homecare Sep 2020 – Current

Note: Transitioned to new employer/payroll for the same role in April 2025.

- Provided in-home care and daily living support for elderly clients, including bathing, dressing, meal preparation, and medication reminders.
- Maintained a safe, respectful, and reliable care environment through consistent communication and routine support.

Crew Member, Dunkin Donuts – Sunnyside, NY Oct 2022 – Mar 2023

- Handled customer orders, cash/POS transactions, and food preparation in a fast-paced store environment.
- Resolved customer issues professionally while maintaining speed, accuracy, and cleanliness standards during peak hours.

Technical Projects

Secure Home Monitoring & Automation System imelvee.github.io/camera-server
| *Network Security, Docker, Ubuntu*

- Built and operated a Docker Compose home-monitoring stack on Ubuntu using Home Assistant, Frigate, Mosquitto, and Nginx to process RTSP camera events and deliver person-detection alerts.
- Secured externally accessible Home Assistant access through an Nginx reverse proxy, DNS-01 certificate automation, ModSecurity/OWASP CRS rules, UFW restrictions, authenticated MQTT, and segmented Docker bridge networks.
- Automated container checks, host health checks, certificate renewal, rotating configuration backups, log maintenance, and recurring vulnerability and host audits using shell scripts, cron, and systemd timers.
- Tuned video analytics for a low-power Intel host using VAAPI iGPU decoding and RTSP substreams.

Spotify Interface imelvee.github.io/peepify
| *JavaScript, React*

- Collaborated on a four-person React/Vite application that extended Spotify account analytics and playlist controls through Spotify API integration, with separate frontend, Python backend, and database components.
- Contributed Appwrite OAuth login/logout, session handling, page navigation, queue/history/currently-playing views, polling-based realtime display updates, Spotify playback controls, and UI fixes.

SpaceWayRush imelvee.github.io/game-engine
| *C++, OpenGL, GLFW*

- Built a lane-based arcade game in C++ using an OpenGL-based course engine.
- Implemented player movement, randomized obstacle spawning, collision detection, lives, scoring, restart behavior, and increasing difficulty over time.

Skills

Languages: JavaScript/TypeScript, Python, C++, Dart, SQL
Frameworks & Web: React, Flutter, Vite, FastAPI, REST APIs, OAuth
Systems & Deployment: Linux, Docker, Docker Compose, Nginx, Git, GitHub
Additional: MQTT, TLS/ACME, Bash, CMake, Microsoft Dataverse
